

NEAT™ GLASS

RELIABILITY *for real life*®

Clean and Simple

JELD-WEN® wood windows and patio doors are now available with Neat™ glass, which provides natural cleaning convenience. This glass features an invisible permanent coating of titanium dioxide and silicon dioxide, so it stays cleaner longer.

- Dirt is loosened via the sun's UV rays, so rainwater can easily rinse away grime
- Glass is effective even when the sky is cloudy
- The ultra-smooth glass surface prevents water spots
- No manual activation is required

A natural reaction

The titanium dioxide in Neat glass reacts chemically with UV rays, which cause organic materials on the glass to decompose. Rain can then rinse this decomposed material (generally dirt) away, leaving the glass virtually pristine. This chemical reaction works even on cloudy days, because 80 percent of the sun's UV rays break through cloud cover.

Enjoy effortless reliability

These JELD-WEN collections offer Neat glass:

- Custom Wood windows and patio doors
- Premium Wood Siteline EX windows and patio doors
- Premium Wood Tradition Plus windows and patio doors
- Vinyl window and patio door collections available east of the Rocky Mountains

RELIABILITY *for real life*®

A clearer view

Neat glass includes silicon dioxide for a practically spotless surface. In fact, it's remarkably smooth, so water disperses evenly, sheets off and evaporates quickly. These qualities greatly reduce water spotting. Review the images below to see how Neat glass compares to ordinary glass.

Neat glass *superhydrophilic*

The smooth surface disperses water evenly, removing dirt quickly and limiting water spots.

Ordinary glass *hydrophobic*

Water beads are more pronounced on the rough surface of ordinary glass, causing more spots and requiring more cleaning.

RELIABILITY *for real life*®
